Setting the Bar for Major Projects in Western Canada: West Calgary Ring Road Opening December 19, Marks Milestone for Stoney Trail opening

Calgary, AB – Carmacks Enterprises Ltd. Managing Partner of the joint venture between Carmacks Enterprises Ltd., VINCI Construction Geo Infrastructure, and Graham Construction, together, known as Calgary Safelink Partners, proudly announce a momentous occasion – the successful completion of our latest design & build project, the West Calgary Ring Road, 10 months ahead of schedule. This achievement not only sets a new standard for major projects in the region but also stands as a testament to the remarkable efforts of our dedicated team.

Completing the West Calgary Ring Road project 10 months early is a win not just for the project, but for Calgarians and the citizens of Alberta who will now be able to utilize the entire Stoney Trail network, spending less time in congestion on other major city routes. It demonstrates our commitment to delivering results that positively impact the community and the travelling public.

“This achievement goes beyond meeting deadlines, it speaks to the culture of safety and excellence that defines our team. We prioritized safety, collaboration, innovation, and a shared vision, ensuring that every decision made was the “best-for-project” decision, ultimately contributing to its success.” – Darcy Taylor, Project Director, Calgary Safelink Partners

We extend our sincere appreciation to the dedication, expertise and resilience of the entire project team, including our valued partners, subcontractors, Alberta Transportation and Economic Corridors, and Associated Engineering, whose unwavering commitment and collaboration have been integral to this success.

As we celebrate this accomplishment, we hope it serves as a source of inspiration for future endeavors. It is a reminder that with the right team and the right mindset, we can overcome any challenge and achieve greatness. We look forward to continuing to set new benchmarks in the industry, pushing the boundaries of what is possible in major projects in Western Canada.
